

Radio Compliance Statements

Federal Communications Commission

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
1. This device may not cause interference, and

To comply with FCC/ICRF exposure limits for general population / uncontrolled exposure, the antennas used for this transmitter must be installed to provide a separation distance of at least 80 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

Industry Canada

This Device complies with Industry Canada License-exempt RSS standard(s). Operation is subject to the following two conditions:

1. This device may not cause interference, and
2. This device must accept any interference, including interference that may cause undesired operation of the device.

This radio transmitter 22504-T0005281 has been approved by Industry Canada to operate with the antenna listed below with the maximum permissible gain or lesser and required antenna impedance for the antenna indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

This device complies with IC radiation exposure limits set forth for an uncontrolled environment. This device should be installed and operated with minimum distance 0.3 m between the radiator and your body.

This device has been designed to operate with the antenna listed below, and having a maximum gain of 2.7 dBi. Antennas not included in this list or having a gain greater than 2.7 dBi are strictly prohibited for use with this device. The required antenna impedance is 50 ohms.

Antenna: ET830DBLTRPSMA – Airgain, Inc.

During product operation, always keep a separation distance of at least 11.8 inches (0.3 m) from any connected antenna(s). Before servicing the product, the antenna(s) or cables, turn off the transmission function or the unit power if you have to get closer than the minimum separation distance.

Déclarations de conformité radio

Commission fédérale des communications

Cet appareil est conforme à la partie 15 des règles FCC. Le fonctionnement est soumis aux deux conditions suivantes:

1. Cet appareil ne peut pas causer d'interférences nuisibles, et
2. Cet appareil doit accepter toute interférence reçue, y compris les interférences susceptibles de provoquer un fonctionnement indésirable.

Les changements ou modifications non expressément approuvés par la partie responsable de la conformité peuvent annuler l'autorité de l'utilisateur à utiliser l'équipement.

Cet équipement a été testé et déclaré conforme aux limites d'un appareil numérique de classe B, conformément à la partie 15 des règles de la FCC. Ces limites sont conçues pour fournir une protection raisonnable contre les interférences nuisibles dans une installation résidentielle. Cet équipement génère des utilisations et peut émettre de l'énergie radiofréquence et, s'il n'est pas installé et utilisé conformément aux instructions, peut provoquer des interférences nuisibles aux communications radio. Cependant, il n'y a aucune garantie que des interférences ne se produiront pas dans une installation particulière. Si cet équipement cause des interférences nuisibles à la réception radio ou télévision, ce qui peut être déterminé en éteignant et en rallumant l'équipement, l'utilisateur est encouragé à essayer de corriger l'interférence par l'une des mesures suivantes:

- Réorienter ou déplacer l'antenne de réception.
- Augmentez la distance entre l'équipement et le récepteur.
- Connectez l'équipement à une prise d'un circuit différent de celui auquel le récepteur est connecté.
- Consulter le revendeur ou un technicien radio / TV expérimenté pour obtenir de l'aide.

Pour respecter les limites d'exposition RF FCC / IC pour la population générale / exposition incontrôlée, les antennes utilisées pour cet émetteur doivent être installées de manière à fournir une distance de séparation d'au moins 80 cm par rapport à toutes les personnes et ne doivent pas être co-localisées toute autre antenne ou émetteur.

Industrie Canada

Cet appareil est conforme aux normes RSS exemptes de licence d'Industrie Canada. Le fonctionnement est soumis aux deux conditions suivantes:

1. Cet appareil ne peut pas causer d'interférences, et
2. Cet appareil doit accepter toute interférence, y compris les interférences susceptibles de provoquer un fonctionnement indésirable de l'appareil.

Cet émetteur radio 22504-T0005281 a été approuvé par Industrie Canada pour fonctionner avec l'antenne énumérée ci-dessous avec le gain maximal admissible ou l'impédance d'antenne moindre et requise pour l'antenne indiquée. Les types d'antennes non inclus dans cette liste, ayant un gain supérieur au gain maximal indiqué pour ce type, sont strictement interdits pour une utilisation avec cet appareil.

Cet appareil est conforme aux limites d'exposition aux radiations IC définies pour un environnement non contrôlé. Cet appareil doit être installé et utilisé avec une distance minimale de 0,3 m entre le radiateur et votre corps.

Cet appareil a été conçu pour fonctionner avec l'antenne listée ci-dessous et ayant un gain maximum de 2,7 dBi. Les antennes non incluses dans cette liste ou dont le gain est supérieur à 2,7 dBi sont strictement interdites pour cet appareil. L'impédance d'antenne requise est de 50 ohms.

Antenne: ET830DBLTRPSMA - Airgain, Inc..

Pendant le fonctionnement du produit, gardez toujours une distance de séparation d'au moins 11,8 pouces (0,3 m) de toute antenne connectée. Avant de réparer le produit, l'antenne ou les câbles, désactivez la fonction de transmission ou l'alimentation de l'unité si vous devez vous rapprocher de la distance de séparation minimale.

Radio Compliance Statements
